How to Attach an Image File to an Email

Using this method, the image appears as an attachment that the recipient must download to view. You can use this method to attach multiple images to your email.

Compose a New Email: Open your email client (e.g., Gmail, Outlook, Apple Mail) and start a new message.

Locate the Attachment Option: Look for an icon that resembles a paperclip or a link that says "Attach files".

Browse and Select: Click the icon to open a file browser window on your computer or phone.

Find the Image: Navigate to the folder where your image is stored, select the file(s), and click "Open" or "Choose".

Verify and Send: The file name should appear in the email, often near the subject line. Once uploaded, add your recipient, subject, and message, then send the email.
